

NEW BRAND!

Global connectivity beyond walls
with Mexico's smartest network

International Network

Vívaro Telecom

Vívaro Telecom is a company that offers telecommunications, IT solutions, and cybersecurity services. Its current high-capacity metropolitan and long-distance fiber optic network deployment ensures operational continuity based on its interconnection to the main National and International Data Centers, with a variety of border crossings into the US, all managed with an optimal model of operation, monitoring, and management of its ultra-low latency network.
